Note: no power or toilet facilities

### **Directions**

**From Sierra Vista**, drive north on Highway 90. About 1.9 miles past the Babocomari River bridge on the north side of Huachuca City, you'll pass under an overhead electronic message sign. Drive 4/10<sup>ths</sup> further and turn right on AZ Wildcats Drive.

**(From Mustang Corner** (intersection of Highway 90 and Highway 82), drive 1.1 miles south and turn left onto AZ Wildcats Drive. This is the first median break south of RV City)

AZ Wildcat turns back to the south, running parallel with Highway 90. Take the first left onto Ronald Reagan Parkway, which is a paved road.

Drive 8/10<sup>ths</sup> mile on Ronald Reagan Parkway and turn left onto the local dirt drive. That will lead to cleared area about ¼ mile back from the paved road.

The drive is hard to see, so we will leave a car parked at the top of the drive on the paved road to mark the entrance. There's no culvert, so the drive dips down into the ditch, but it's absolutely no problem for a standard car if you take it slow.

There's a cleared and scraped area at the end of the drive suitable for parking and telescopes. Bring a power pack for your gear and a lawn chair for your rear.

Arrive by 6 PM for food and refreshments al fresco, provided by Gloria. Let us know if you're coming so we can be sure to have enough food on hand.

Sunset is at 6:20 PM. If you arrive after dusk, I prefer that you park on the paved road and walk back to the cleared area, which is about 1,200 feet. Don't forget your flashlight!
